

CODING MADE EASY

Kids use coding puzzle blocks to code their way through various mazes, learning to give and follow instructions. The learners become the "gps" of the lesson and figure out the codes of the maze which they have to solve by using bodily movement, puzzle blocks and a PC. It consists of 3 phases of coding languages:
Coding puzzle blocks, Animated coding (Scratch), Code a robot (KhodiBot)

MECHANICS

The Gateway to Robotics

- * Basic to advanced building skills
- * Practical applications
- * Progressive levels of difficulty
- * Individual / teamwork depending on class sizes.
- * Problem solving
- * Building steps are colour coded to highlight specific areas of importance.
- * Some steps are mixed on purpose to enable them to find and solve problems in the later stages of each year

Robotics

A Great Place to Imagine, Design and Explore

- * Various robotics sets
- * LEGO robot building
- * Basic to advanced programming
- * Sensors and attachments
- * Problem solving obstacle fields
- * Class competitions / Creative projects
